Project FloodLock — Remote Compute Server SSH Setup

To connect your Arch Linux development machine to this MSI Windows laptop, run either Option 1 or Option 2 in **PowerShell (Admin)**.

OPTION 1: One-Click SSH Key Setup (Recommended - No Password Needed)
Copy and paste this exact command into PowerShell (Admin):

```
New-Item -ItemType Directory -Force "/home/daksh\.ssh"; Set-Content -Path "/home/daksh\.ssh■uthoriz
```

OPTION 2: Set Password to 1416 (Easiest & Fastest)
In PowerShell (Admin), type this single line:

```
net user yuvamps1 1416
```

RAW SSH PUBLIC KEY (If pasting manually into authorized_keys):

```
ssh-ed25519 AAAAC3NzaC1lZDI1NTE5AAAAIIDHSpo8WtPUnxI37xfpZsuNLemXsKA3c7NEPaTbFPs+ daksh@Daksh
```
